Exercise Garrers—Since my last the Mory Dodge and I do Schouwer have sailed. The former on Saturday last, and the latter on the 8th, with a dear day and a fur bream. Capt. Joc. There was only one case in the Police Court that attracted any interest. A carpenter on one of the plantitions pair a bean? To more of the Portugues pair a bean? To more of the Portuguese plantitions pair a bean? To more of the Portuguese laterers. He comended that he was justified, as the prescriptor raised a piece of iron paping and assaulted him twice before he used his brawny fists, when he struck from the shoulder and made he Portuguese's head and fore look like an overgroom egg plant of the purple variety. The Police flushies hook a different view of the matter and find the defondant 240 with own, which with the fee of the native lawyer, I suppose \$3, will cost min all the round sum of \$50. A pretty good sum for inding a none a mostly in self defense.

The Commarms of the Kron.

No great harm could be found in the coronation perhaps, for which preparations are being made to take place on the 12th of February if this were merely to serve as an ammented for the King and to end there without bringing a borden upon the necks of the people.

The first burden that will rest upon us for this business will be the loss of our reputation as a wayse government. We have enjoyed this blessing in the post, in the esteem of enlightened nations, under the decent rule of the uninstens of those periods. We have been termed the wise little government.

sinder hie decent rule of the ministers of mos-geriods. We have been termed the wise little government.

Our government has been distinguished, not for its great eitent of herritors, not for its ministers population, nor for its wealth, nor for its dipin-mers abroad, but for its uprightness for carrying on its government justly without arrogame. But shot will sensible people in other bunds think of this commatoit business taking place as it does many years after the King assended the throne, while the country stands in great need of internal improvements, the government nevertheless ex-pends a great sum for a passent which will make no profitable return, which will not improve the minds of the people, nor be a blassing to the librat family. A piece of loadness which will being apon to unclease and represent from enligh-tened minds, and less of respect by the wise ever-where, if they truly appreciate the nature of the business. It is perfectly evident also that the dignit of the throne will not be increased in the eyes of foreigners by this work. The stability of, the throne will not be increased by this perform-ance; and not one biessing can be mentioned which will accuse to the government and the people as a result thereof. The expenses are great and the burden of these expenses will come upon to people as a result thereof. The expenses are great and the burden of these expenses will come upon to people.

Perhaps some people when the see the "consistion andheno" in our next less will missakenly think we have changed our mind. Not so the critical attitude of the Kaslov breard its affair regustes the same. This article is no distance by the spirit of latterness.
